

This is Java Programming Code for Calculating Percentage for Exams :

// hello,this is my cbse board percentage calculator for Exams

```
import java.util.Scanner;

class Main {
    public static void main(String[] args) {
        Scanner sc = new Scanner(System.in);
        System.out.println("Marks of English ");
        float a = sc.nextFloat();
        System.out.println("Marks of Maths");
        float b = sc.nextFloat();
        System.out.println("Marks of Science");
        float c = sc.nextFloat();
        System.out.println("Marks of Social Studies");
        float d = sc.nextFloat();
        System.out.println("Marks of Hindi");
        float e = sc.nextFloat();

        float Percentage = ((a+b+c+d+e)/500)*100;
        System.out.println("Your Percentage is:" + Percentage);

    }
}
```
